

Executive Building Update

The vision committee continues to work on a Needs and Feasibility questionnaire along with a Financial Intention Form to be distributed to the congregation beginning in the end of July. Town hall meetings will be setup at various times throughout the upcoming months to try and accommodate everyone's busy schedule. Stay tuned for time and locations.

New boilers have been approved by council to be installed prior to the 2009 heating season. Local contractors have been asked to bid on this project and we are waiting for their estimates. We will review the bids and inform you of the costs when it is determined.

As we have stated in the presentations leading up to the vote, the physical plans for the church will be developed after space and mission needs have been clearly defined. The location of the new church will be defined at that time when a site plan can be developed. Any drawings or plans being distributed are only thoughts on paper trying to determine ways to build a new church cost effectively. The final plans for a church will be developed with the input of the entire congregation, and voted on at a later date.

This is a long process. We encourage anyone with questions or concerns to forward them to Rick Lipka in care of the church office of St. John's Lutheran Church.
